DETAILED ACTION

1. This Office Action is in response to the application filed 08/15/2001. Claims 1-20 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Conlow (US PG Pub# 2002/0069167).

- A. As per claim 1. Conlow discloses a method for supplying information to users about each stage of a multi-stage project before dispensing funds comprising the steps of:

inputting a set of terms for dispensing funds for each stage of a multi-stage project (Conlow: [0059]; [0086]; [0089], reads on "project agreements");

recording data related to the terms for dispensing funds (Conlow: [0079];

and

dispensing funds after the completion of each stage of the multi-stage project
(Conlow: [0060];

wherein completion of each stage is dependent upon viewing and approving
each stage of the multi-stage project (Conlow: [0051]; [0081]; [0090], reads on
"confirm the progress of the task").

B. Conlow further teaches the features of the following claims:

Claim 2. The method according to claim 1, wherein the step of inputting the set of
terms for dispensing funds comprises the step of entering a completion date for
each of the stages of the multi-stage project (Conlow: [0081]).

Claim 3. The method according to claim 1 further comprising the step of
assigning a number to the multi-stage project (Conlow: [0086]).

Claim 4. The method according to claim 1 further comprising the step of entering
a user ID and password (Conlow: [0086]).

Claim 5. The method according to claim 3, wherein the step of recording data comprises the step of listing the multi-stage project number and a manager responsible for the multi-stage project (Conlow: [0086]).

Claim 6. The method according to claim 1 further comprising the steps of: generating a chart listing multi-stage project data; distributing the chart over a communication network; assigning an identification and password for approved persons related to the multi-stage project; generating a timeline image relating to the multi-stage project; and allowing the approved persons access to the timeline (Conlow: Fig 10, items 1045 to 1092; [0086]).

Claim 7. The method according to claim 6 further comprising: generating a task box related to the multi-stage project with icons for starting, ending and confirming a task; and designating which of the approved persons is responsible for starting, ending and confirming the task (Conlow: [0086]).

Claim 8. The method according to claim 7 further comprising the step of sending a message to any approved person that is designated to be notified of the starting, ending or confirming of the task (Conlow: Fig 10).

Claim 9. The method according to claim 7 further comprising the step of allowing the approved user to access images of the multi-stage project by accessing an

imaging device located near a construction site of the multi-stage project
(Conlow: [0079]).

Claim 10. The method according to claim 1 further comprising the step of storing
the data in memory (Conlow: [0079]; Fig 143).

C. Claims 11-20 are system and software claims to perform the methods of claims
1-10 and are rejected for substantially the same reasons provided for claims 1-10.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to
applicant's disclosure. The cited but not applied prior art teach for providing payment at
stages of a progress including escrow or escrow-like features.
